Unified Communications & Payment Processing Solutions

Alternative Payment Processing for Online Pharmacies

Genie Gateway is an originator of alternative payment processing, NOT a middleman, or a reseller. We *built* it... to serve YOU!

If your customers reside in the U.S., and if your company has a U.S. bank account where you can deposit USD payments, then Genie Gateway is ready to help with processing payments from your customers anytime, 24/7 - 365.

Now Online Pharmacies serving U.S. customers can accept electronic checks (Check22) as payment for goods, online and on the phone, anytime, 24/7 - 365!

With this new service, your telephone operators need ONLY ask your customer's cell phone number, their first and last name, their bank routing and account number, plus their email address. Once processed, your customer will get a confirmation text message on their cell asking them to approve the payment: YES or NO. If they respond with a YES we email you a Check22 which you can deposit right away.

We also offer FREE GenieChecking Virtual Checking Accounts to your returning customers, so that they can pay you in "Real-Time". These repeat customers can complete their next purchase by calling your unique toll-free number and selecting "To Send a Payment, press 3".

Unified Communications & Payment Processing Solutions

Your unique toll free number is automatically provided as part of your Genie Gateway. Use it for accepting payment by phone, for customer service, and a host of other included services.

Your customers will be able to:

1. Connect their call to your center
2. Leave a message
3. Send a payment
4. Send a FAX
5. Send a text message

To activate your GenieChecking now click on either button below:

Merchants

Agents
